### **Continuing education committee**

The OOTA sponsored workshop, All Behavior Has Meaning: A Lifespan Perspective, held on February, 21, 2009 was a success. I would like to thank the speakers, Laurie Morudian, ScD, OTR/L, Beth DeGrace, PhD, OTR/L and Toby Hamilton, PhD, OTR/L, The University of Oklahoma and everyone involved in assisting with the workshop. Based on the attendee feedback, the subject matter was informative and the speakers were effective.

The workshop attendees identified six different topics for future workshops. The topics included splinting, sensory integration disorders including autism, stroke, animal therapy and creative opportunities for part time employment. If you have a preference for one of these areas and or suggestions for other topics, please email me at Troylee@hillcrest.com. OOTA is here for you and it is our goal to provide you educational opportunities to meet membership need. Without your input, we are not able to meet your needs.

The continuing education committee is working on coordinating a summer or Fall retreat with an educational component and is working with the membership committee to schedule a membership drive event to be held in Tulsa and in Oklahoma City. Details for these events will be printed in future OOTA publications and on the OOTA web page.
